Reception: 29.08.2022
Contractor: Vanhout
Structural engineering firm: Ney and partners
Technical engineering firm: Boydens
Building physics engineering firm: Daidalos-Peutz
Green concept engineering firm: Denis Dujardin

The renovated Buildwise headquarters in Zaventem showcases circular construction and sustainable building innovation. Through selective dismantling and reversible design, materials are reused and future adaptations enabled. A high-tech green façade, a naturally ventilated atrium and a fossil-free energy concept turn the building into a living lab for forward-looking construction.
